- Connected to AmazonFresh V1.0 API

Exercise Tracker

- Built in Ruby on Rails, Javascript, HTML, CSS, Handlebars

## Education

Johnson & Wales University

2014

Bachelor of culinary arts and foodservice management

## Passion Project

In my spare time I like to turn my apartment into a speakeasy style restaurant for one night at a time where I serve a menu that I design. I hire staff to make the experience feel professional.

This allows me a creative outlet where I can execute the things I want to, but are not necessarily practical for a viable day to day business.
